- A SQL Server 2012 cmdtype type issue related to CREATE SERVER ROLE and DROP SERVER ROLE has been resolved. (1085203)

- mcap module no longer fails to load on Linux due to MAX_PID configuration. (1120739)

- Unix OS commands are no longer deleay when the McAfee DAM sensor is active. (1122771)

- Oracle databases on Windows can now be monitored with a non-default bin path. (1126546)

- An issue related to memory utilization on Linux when monitoring MySQL has been resolved. (1138103)

- An issue related to generating the sensor analytic package on Windows server in specific situations has been resolved. (1138269)

Installation instructions

For information about installing or upgrading McAfee DAM, see *McAfee Database Activity Monitoring 5.2 Product Guide*.

Known issues

For a list of known issues in this product release, see this McAfee KnowledgeBase article: KB87368.

Find product documentation

On the **ServicePortal**, you can find information about a released product, including product documentation, technical articles, and more.

Task

1   Go to the **ServicePortal** at https://support.mcafee.com and click the **Knowledge Center** tab.

2   In the **Knowledge Base** pane under **Content Source,** click **Product Documentation.**

3   Select a product and version, then click **Search** to display a list of documents.
